POND CHEEK, OKLA.,)

August 24, 1894. ED. PRESS: For the benefit of any of your readers who may be interested in our new country, we send you the following brief sketch for publica-

The Indian Territory comprises perhaps it will never be duplicated on part of the Louisiaua purchase, and was bought from France in 1803 by Thomas Jefferson.

It extends from 33 degrees and 40 minutes to 37 degrees north latitude, aud from 94 degrees and 30 minutes to 102 degrees west longitude, and contains about 68,900 square miles. It was set apart by the government in 1830 for the occupancy of the Indian tribes then seattered about over the South and West. The following tribes were afterwards removed and placed on reservations within the Territory: Cherokees, Creeks, Choetaws, Chieasaws, Seminoles, Osages, Nez Perces, Kansas, l'oneas, Ottoes, Missouris, Pawnees, Iowas, Sae and Fox, Kieapoos, Pottowatamies, Cheyennes and Arapahoes, Wichitas, Kiowas, Co manches and Apaches.

The first five named comprise what is known as the five eivilized tribes, nal Indian Territory since the cutting plowshare of his successful rival will and occupy what is left of the origioff of Oklahoma on the west. These five tribes have beeune more or less eivilized, and have adopted to a certain extent the ways of the white man. In this forced march from barbarism to envilization, the Cherokees have taken the lead and have been elosely followed by the Creeks, Choc- sufferings and brave the dangers incitaws and Chicasaws.

A trip through the Cherokee conn- days following if the result should be try at the present time would astonish a home in this beautiful and pietu gard the Indian as an untamable child of the forest, incapable of allvancement and unfit to govern or be gov-

In going through the Cherokce country the traveler is everywhere met by evidences of mental, material and social advancement. Fine farms stocked with blooded horses and eattle, neat furm houses and fine school houses and churches meet the gaze of the astonished tourist in every direction, and force upon the mind the unmistakable fact that in the forward march of agricultural progress the Cherokee Indian is far in advauce of many of his pale faced brethren of the south and east.

All that part of the original Indian Territory lying west of the five civilized tribes has been by various acts of congress cut off from the original Indian Territory, and a separate territorial government organized under the name of Oklahoma, embraciug what was known as old Oklahoma. the Sac and Fox country, the Cheyenne and Arapahoe reservation, the Cherokee Strip, and the strip of publie land north of Texas, which was heretofore known as "No Man's

The Chinese nation is a human nass-immense, tenacious, patient and elf-sufficient. In China wars, revolutions, thoods, fires and pestilencesare on a scale commensurate with the population. The greatest conquests in the history of the human race were achieved there by the Tartar followers

of Ghengis Khan and Tamerlane. "The use of 'Castorla is so universal and its merits so well known that it seems a work of smererogation to endorse it. Few are the China inflamed the imagination of Napoleon Bonaparte. After Toulon elligent families who do not keep Castori within easy reach." and before Montenotte he asked per

mission of the French Directory to accept an officer's commission in the Turkish service. He had his eve or war between Chinn the far east. He was filled with the and Japan is more sanguinary glory of Ghengis Kahn pieturesque, says and Tamerlane. He said to a friend: "The East is the only thentre of mightv eveuts. A man can win glory there." But the permission was refused. China esemped him, Europe

China has had an inealenlable influence upon the history of Western Enbe and America. How?

Beeanse China drove the II uns and the Turks from our borders. They vandered across Asia in great migratory bands, increasing in numbers as BOOKS they came, helped to beat down the STATIONERY, Roman Empire, totally destroyed the ETC. Byzantine Empire and made such a hange in European history that it is felt to this day.

All school boys have heard of the Freat Wall and the Grand Canal of China. Those are two things about China that we never torget. The canal is so long and so large that people get into the habit of numbering it among the great rivers of China.

The Great Wall is man's most gigantie work. It was built to keep ont the Tarturs more than two thousand years ago. It is of immense height phere. The number of corpses ahea- became intense, and the whole volca- chiefly of thinly inhabited regions like and thickness and is fifteen hundred miles long. It is said that an army of 400,000 men was sent against the Tartars and after defeating them, was employed many years in building this

has tried to get for his show. Thus China, even more than Egypt, is the Sphyux, but not the Niobe, of na-

intagonist! The area of all Japan is mly 147,000 square miles, or exactly bree times that of the State of New ot 1890, was 40,072,684, or less than one tenth that of China.

This disproportion makes the war between China and Japan vastly interesting. Nor must it be forgotten that the war is likely to make a great ncrease in our knowledge of that hidleu country, China.

What we know the least about in his country is the Chinese baby; here we facts about him: Nearly all Chiese babies are blondes. All grown up Chipese men and women are deciled brunettes. Nevertheless the babies are blondes. It is a freak for which nobody can account.

The average Chinese baby bas a ransparant rose and white skin, large eyes, varying from gray and light hasel to brown, and sott, silky hair that is usually auburn in color. In North thing babies are often born with blue or green eyes and light red hair. During the infancy of her child the Chinese mother is supreme in her nousehold. If John clutters about the house too much and disturbs the could be stuck away in a corner of baby, woe to his pigtail if his wife can
